Fall 2016 - Spring 2017, Bozeman, MT

Saint John's University / Bachelor of Computer Science

Fall 2015 - Spring 2016, St. Joseph, MN

Related Employment

Smooth Moves, LLC / Owner

March 2017 - October 2019, Twin Cities, MN

This is the first company I started on my own. I had to go through all the steps a new company faces like forming an LLC, registering with the secretary of state/federal government, and opening business bank accounts. In the first year, I hired 8 of my friends and we did about 90 residential and commercial moves. As the company grew I decided to hire a skilled developer to create a dispatching software (PWA) which managed each job's information and allowed employees to pick-up jobs and have access to the job's details. The employees also decided when they wanted to work, so the business model was like Uber, but for furniture moving. I eventually decided I no longer wanted to be in the industry and my only regret was not developing the software myself.

Web Developer / Self Employed

Off and On, Minneapolis, MN

Since I was 13, I have been interested in web development and done various websites for myself and family members.
